Terms of Acceptance

When a person seeks chiropractic and is accepted for such care, it is essential for both parties to be working towards the same objective. As a Chiropractic facility we have one main goal, to detect and correct/reduce the vertebral subluxation complex. It is important that each person understand both the objective and the method that will be used to attain this goal. This will prevent any confusion or disappointment.

Adjustment: An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method is by specific adjustments of the spine.

Health: A state of optimal physical, mental and social well-being, not merely the absence of disease or infirmity.

Vertebral Subluxation: A misalignment of one or more of the 24 vertebra in the spinal column which causes alteration of nerve function and interference to the transmission of mental impulses, resulting in a lessening of the body's innate ability to express its maximum health potential.

We do not offer to diagnose or treat a disease or condition other than vertebral subluxation. Regardless of what a disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. Our Only Practice Objective is to eliminate a major interference to the expression of the body's innate wisdom and ability to heal. Our only method is specific adjusting to correct vertebral subluxations combined with rehabilitation procedures.

method is specific adjusting to correct vert	ebral subluxations combined with rehabilitation procedures.
I have reac	and fully understand the above statements.
All questions regarding the doctor's object therefore accept chiropractic care on this b	ives pertaining to my care in this office have been answered to my satisfaction. I asis.
